

ENOUGH! We say ENOUGH! O Winter 2014
No more of minus 30 nights and days
Nor wind Chill - Clouds and Snow knee-deep.

—
Awaken forest from your sleep
Cast off the hold of season long
And give us now long-awaited song
Of birds - not dropping to the ground
But chirps that say a nest they've found.

—
The sights that now we long to see
Of buckets hanging from the tree
Drip drip of sap, the smell so sweet
Of favourite springtime things to eat.

.....
Yes winter's fine - we like it so
But now is time to let it go
The trees have slept - regained their strength
For sap to flow throughout their length

.....
Old wisdom says frost overnight with daytime highs on the
plus-side might
Cause sap to flow - a springtime show!
Warm by day and cold by night
We're on the way - It's at least HALF right.
